Free Making Fiberglass Fender Molds

DIY Carbon Fiber Fenders. The big test was making the fenders. I should have started with a much more simple part. These fenders have a lot of curves, undercut areas and sharp details. A real nightmare. The molds were some of my first efforts and needless to say, they left a lot to be desired. Every detail is how I decided to present this work.

How To Make DIY Carbon Fiber Fenders and Body Panels

The copy made of fiberglass is referred to as a mold. The process of making a fiberglass body mold is lengthy but worthwhile for those who wish to save money on car repairs. Step 1. Put on your goggles and gloves. Spray or brush one layer of mold-release wax onto the surface of the automotive part. Do not disturb the part for one hour.

20+ Best MOLDS images | mold making, molding, fiberglass mold

So the way molds are usually made I would need to repair and prep my fender and attach something to the underside to form a 2-3" flange all the way around the fender, then pull a mold, sand and prep the mold and pull a part. This is a lot of work for a one off part.

Making a fiberglass fender | Adventure Rider

Added 3 more layers of fiberglass and pulled the final mould of the first one. Now it just needs a bit of wet sanding and I can make the fender. If I use 5 layers of fiberglass like on the mould, it will be strong enough to not need any reinforcement on the inside I can sit on the mould now without it even pushing in just a little.
