toyota designed the 4afe head for low to mid range driveability. the intake manifold on the 4age has shorter runners to accommodate the high end characteristics of the 4age head design. just because something has better flow doesn't mean you will benefit from it. if you want something similar look into the 7afe stuff since its a larger displacement engine. as far as 4age manifolds go the smallport intake manifold is the better of the two 4age manifolds.
